

EMERGING TECHNOLOGY ADOPTION: STAKEHOLDER INTERVIEW GUIDE

Prepared for
Manila Manufacturing Corporation (MMC)

Prepared by
TechVision Consulting Inc.

Submitted by
Shane Kearl D. Dela Paz

September 12, 2026

1. Introduction / Interviewer Instructions

The interview guide has been prepared in order to find out how Manila Manufacturing Corporation (MMC) carried out its daily operations, what major problems they are experiencing and how ready they are to make use of new technologies. The answers given by the key stakeholders will form the basis of a recommendation regarding the adoption of technology by the company.

1.2 Purpose of the Interview

This interview aims to:

- Evaluate MMC's current operational setup.
- Find out how ready the company is to implement emerging technologies (AI, Machine Learning, AR, IoT, Cloud Computing, Big Data Analytics, and Quantum Computing).

1.3 Interviewer Instructions

- Introduce yourself and TechVision Consulting Inc. Briefly explain the purpose of the interview and how the information will be used.
- Make sure that each question is asked clearly and allow the person being interviewed enough time to answer it.
- Ask follow-up questions if an answer needs more detail, an example or clarification.
- For each question, write down the key responses and the main points in the space provided.
- Keep the discussion focused on MMC's operations, current technology use, resources, and readiness.
- At the end of the interview, please thank the interviewee and explain what the next steps are.

2. Interviewee Information

To be completed by the interviewer at the beginning of the session.

Interviewee Name: _____

Position / Role: _____

Department: _____

Years with MMC: _____

Date of Interview: _____

Interviewer Name: _____

Interview Location / Platform: _____

3. Background and Current State

1. Can you briefly describe what you do at MMC and your main responsibilities?

Probes: What aspect of your job is most influenced by the way MMC is currently operating?

Notes:

2. What is currently the way in which MMC manages production and daily operations?

Probes: What specific tools, systems, or equipment are you relying on to get work done?

Notes:

3. What are the primary difficulties that MMC is currently encountering in its operations?

Probes: How do these problems affect your team's day-to-day output?

Notes:

4. On a scale of 1 to 5, how would you rate MMC's overall operational efficiency today?

Probes: What made you give it that score?

Notes:

4. Technology Awareness and Readiness

5. When you hear the term "emerging technologies," what comes to mind in the context of manufacturing?

Notes:

6. Which emerging technologies have you personally heard of or encountered, whether at MMC or elsewhere?

Probes: Which of these technologies are you most familiar with, and how have you encountered them?

Notes:

7. How would you describe MMC's current readiness to adopt emerging technologies?

Probes: What makes you say that?

Notes:

8. Has MMC attempted to adopt any new technology in the past?

Probes: What was the outcome and what did you learn from it?

Notes:

5. Industry and Competitive Analysis

9. Where do you see the biggest potential impact of modern factory technologies on MMC's business?

Probes: What shifts do you think could disrupt or improve operations the most?

Notes:

10. How important is it for MMC to keep up with technologies that can change production and the way companies work with customers?

Probes: Why do you consider it important or not important?

Notes:

11. Do you believe adopting emerging technologies is necessary for MMC to remain competitive?

Probes: Why or why not?

Notes:

6. Specific Technology Areas

6.1 Artificial Intelligence (AI)

12. How familiar is MMC with practical Artificial Intelligence applications in industrial settings?

Probes: Are you more familiar with automated decision-making, predictive systems, or generative tools?

Notes:

13. Where do you think AI could be useful in MMC's operations?

Probes: What makes that area suitable for AI?

Notes:

14. What concerns would MMC have about adopting AI when some of its future applications and effects are still uncertain?

Probes: How could those concerns affect an adoption decision?

Notes:

6.2 Machine Learning

15. How familiar is MMC with Machine Learning as an application of AI that allows a machine to learn from experience?

Probes: Where have you encountered this type of technology?

Notes:

16. Could you see Machine Learning being useful in any of MMC's operations?

Probes: What activity could benefit from a system that learns from experience?

Notes:

6.3 Augmented Reality (AR)

17. Are you familiar with AR visual tools, like digital overlays on screens or smart glasses?

Notes:

18. How might Augmented Reality be useful in MMC's manufacturing and warehouse operations?

Probes: Could applications such as warehouse part-selection or repair instructions be useful in these operations? Why?

Notes:

6.4 Internet of Things (IoT)

19. Does MMC currently use physical devices, sensors, or wireless technologies that communicate through a connected system?

Probes: What devices or systems are involved?

Notes:

20. What benefits do you think IoT could bring to MMC's real-time monitoring and decision-making?

Probes: Which part of MMC's operations could benefit the most from this?

Notes:

6.5 Cloud Computing

21. Does MMC currently use hosted services through the Internet?

Probes: What are these services mainly used for?

Notes:

22. What advantages or concerns do you associate with moving more of MMC's systems and data to the cloud?

Probes: Can you elaborate on the concerns you mentioned?

Notes:

6.6 Big Data Analytics

23. Does MMC collect large amounts of data from different sources?

Probes: What types of data are collected?

Notes:

24. How do you think Big Data Analytics could support real-time decision-making in MMC's production or customer management systems?

Notes:

6.7 Quantum Computing

25. How familiar is MMC with Quantum Computing and its use of quantum mechanics to perform calculations?

Probes: What have you heard about its possible uses?

Notes:

26. Realistically, how far away do you think MMC is from needing or benefiting from a technology like quantum computing?

Probes: What have you heard about its possible uses?

Notes:

7. Skills and Capacity

27. Does MMC's current workforce have the technical skills needed to operate or maintain emerging technologies?

Probes: What specific skill gaps exist?

Notes:

28. Would employees need retraining or upskilling programs to support the adoption of new technology?

Probes: What kind of training would be most useful?

Notes:

29. How prepared is MMC to provide the people and technical support needed for a new technology?

Probes: What skills or support are currently missing?

Notes:

30. How open do you think employees would be to changes brought about by emerging technologies?

Probes: What might make the transition easier for them?

Notes:

8. Budget and Implementation

31. Has MMC allocated or considered a budget for exploring or adopting emerging technologies?

Probes: Can you elaborate on the scale of investment being considered?

Notes:

32. What financial barriers might slow down or pause a tech investment decision?

Probes: How might these concerns affect the timing of adoption?

Notes:

33. What would MMC need to prepare before implementing an emerging technology in its operations?

Probes: Which preparation should happen first?

Notes:

9. Closing

34. Among the emerging technologies discussed in this interview, which one do you think deserves the most attention from MMC?

Probes: Why do you think this technology is the most relevant to MMC?

Notes:

35. Is there anything else about MMC's technology needs, concerns, or readiness that you would like to add?

Probes: Can you elaborate on that?

Notes:

Thank the interviewee for their time and valuable insights. Explain that their responses will be used to prepare TechVision Consulting Inc.'s Technology Adoption Recommendation Report for MMC, and that a follow-up may be scheduled if further clarification is needed.

RUBRIC FOR EVALUATION

Criteria	Excellent	Good	Satisfactory	Needs Improvement	Score
Completeness of Sections	All 9 sections complete and well-organized	7–8 sections complete	5–6 sections complete	Less than 5 sections	/15
Question Quality	Questions are clear, relevant, and probing	Most questions clear and relevant	Some questions unclear or irrelevant	Many questions unclear or irrelevant	/15
Coverage of Technologies	ALL emerging technologies covered thoroughly	Most technologies covered	Some technologies covered	Few technologies covered	/25
Alignment with Scenario	Questions perfectly match the MMC scenario	Questions mostly match the scenario	Some questions match the scenario	Questions do not match the scenario	/10
Open-Ended Questions	Excellent mix with effective probes	Good mix with some probes	Some open-ended questions	Few open-ended questions	/10
Professional Format	Very professional, clean, and organized	Professional with minor issues	Somewhat professional	Disorganized or messy	/15
Practicality	Questions are practical and usable	Most questions are practical	Some are practical	Questions are impractical	/10

TOTAL SCORE: ____ / 100
